HIGH QUALITY VIDEO TUTORIALS

In-depth. Comprehensive. Map precisely to spec.

MULTIPLE-CHOICE MICRO-QUIZZES

Over 1,000 questions. Ideal for homework.

EXAM-STYLE QUESTIONS & ANSWERS

Detailed mark schemes. Ideal for exam preparation.

TEACHER DASHBOARD

Automatic marking. Detailed student data.

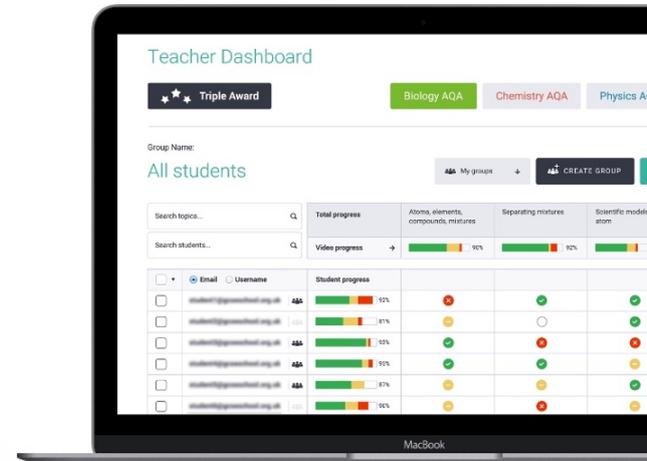

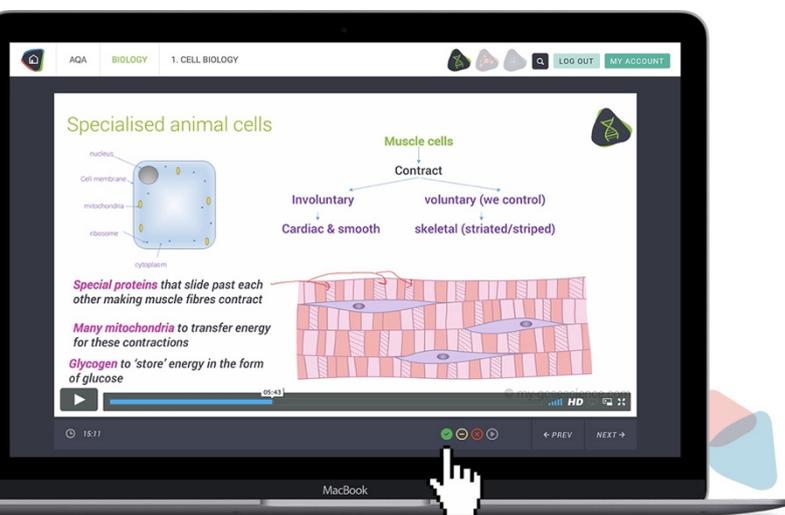

The only *comprehensive* end-to-end solution for the teaching and learning of GCSE Science

Supports Teaching

After watching a video tutorial on a topic, students take a multiple-choice quiz, which is automatically marked. The Teacher Dashboard is updated with the results.

Setting a video tutorial and quiz as homework provides teachers with **automatic marking** and **objective data** on student engagement and progress.

Supports Learning

Watching **video tutorials** of complex concepts and revising topics at their own pace can make a huge difference to a student's understanding and enjoyment of GCSE Science.

My GCSE Science works alongside classroom teaching to take students through the course. Multiple-choice quizzes help embed learning. Our **exam-style questions** and **mark schemes** are perfect for revision before exams.

Improves results

Science teachers at schools across the country are using **My GCSE Science** to support their students navigate a challenging 9-1 GCSE specification. And they're seeing excellent results.

"The massive improvement in the school's GCSE Science results can be attributed, in part, to this online resource that encourages independent learning and revision and flipped learning in the science classroom. Staff and students have a set of succinct video tutorials taught by teachers with experience of the specification, assessment requirements and, crucially, the classroom too. I recommend it to every Head of Science."

Mr MICHAEL TODD, HEAD OF SCIENCE
BISHOP THOMAS GRANT SCHOOL

"We have no doubt that students of wide-ranging abilities have seen a boost to their GCSE grades as a result of using My GCSE Science. Being able to track and plan a personalised, effective revision programme really nurtures the skills they need to become successful independent learners in the longer term. That's a real bonus."

Mrs JANE HALL, HEAD OF SCIENCE
SILVERDALE SCHOOL

"My GCSE Science videos annually play a role in our flipped learning, interleaving and retrieval practice in both our Year 10 and Year 11 schemes of work. Students value the fact that the content that they have studied in school is summarised in short videos, accompanied by relevant exam questions, which serve as useful learning checks for both students and staff. My GCSE Science helps support our students through the two years of GCSE to their successful completion."

Mr PHILIP BALMOND, HEAD OF SCIENCE
THORNEND SCHOOL
